

# Dow Jones Sustainability World Index

May 2009

## Objective

The Dow Jones Sustainability World Index (DJSI World) comprises the leading companies in terms of sustainability around the world. It captures the top 10% based on long-term economic, environmental and social criteria out of the biggest 2500 companies worldwide. Components are selected according to a systematic corporate sustainability assessment that identifies the sustainability leaders in each of 57 industry groups. The underlying research methodology accounts for general as well as industry-specific sustainability trends and evaluates corporations based on a variety of criteria including climate change strategies, energy consumption, human resources development, knowledge management, stakeholder relations and corporate governance. While no industry is excluded in the selection process and in the composition of the DJSI World, subsets of the index provide investors with the possibility to apply filters against certain sectors.
