

Dow Jones Sustainability World Enlarged IndexSM

Fact Sheet

Stated Objective

The Dow Jones Sustainability World Enlarged IndexSM is composed of global sustainability leaders as identified by SAM through a corporate sustainability assessment. The index represents the top 20% of the largest 2,500 companies in the Dow Jones Global Total Stock Market IndexSM based on long-term economic, environmental and social criteria.

Key Features

- Components are selected according to a systematic corporate sustainability assessment that identifies the sustainability leaders in each of 57 industry groups.
- The underlying research methodology accounts for general as well as industry-specific sustainability trends and evaluates corporations based on a variety of criteria including climate change strategies, energy consumption, human resources development, knowledge management, stakeholder relations and corporate governance. While no industry is excluded in the selection process and in the composition of the Dow Jones Sustainability World Enlarged IndexSM, subsets of the index provide investors with the possibility to apply filters against certain sectors.
- The Dow Jones Sustainability World Enlarged IndexSM was first calculated on November 10, 2010.
